

NEW PRODUCT FROM AMANO CORPORATION

Smart Solutions for Mist Collection Technology! Since 1951 Amano Corporation has been providing environmental solutions that improve the workplace and now introduces its filter-less model of oil and water soluble mist collectors. With collection efficiency greater than 99.9% of 2 micron without a filter, four models sizes are available with applications for all types of machining applications: machining center, turning centers and grinding machines.

Amano Corporation also has a full product line of electrical and filtration mist collectors along with its line of dust collectors.
