

FOR IMMEDIATE RELEASE

SilentMaster Platform Truck and Dollies from NANSIN

Schaumburg, IL, May 1, 2012 – As a leading caster manufacturer, NANSIN simply believes that the fundamental purpose of a caster is to move heavy loads using little effort. The smooth running and non-marking casters offered on the Platform Trucks and Dollies from NANSIN are now available from Vega Tool Corporation. NANSIN casters reduce the rolling resistance and provide enhanced mobility and maneuverability when in need of moving loads up to 300 pounds (660kg) for the platform truck and 265 pounds (330kg) for the dollies.

SilentMaster Platform Truck

Mounted on two fixed casters at the handle end and two swivel castors in the front, NANSIN Platform Trucks with NANSIN casters, reduces the amount of effort required to move loads by up to approximately 30% against conventional castors. The durable injection molded plastic platform is fitted with slip resistance pads to aid in load retention. Each truck is fitted with corner buffers along with recessed carrying handles. The easy one-step locking brake system will ensure a safe operation when transporting loads and the powder coated folding handle allows for easy storage when not in use.

Interconnecting Plastic Dolly

Able to handle single loads up to 265 pound (120Kg) per dolly, the NANSIN dollies can be interconnected length-wise or width-wise which expands the work-piece size and weight load, which needs to be transported. At 7.5 pounds in weight (3.4kg) the dollies can be stacked 10 high when not in use. The silent and smooth running, fully enclosed ball bearing castors are the hallmark of NANSIN, which ensures ease of movement.

About NANSIN

For over 50 years NANSIN has been producing a wide range of Nansin Brand Casters for a variety of industries. Today, NANSIN is one of the very few caster and wheel manufacturer to produce every
